

Golf Car Traffic

We are asking two things of our golfers to help our courses be the best they can be:

- Please use the 90 degree rule when riding off the golf car path onto the fairways. That is to say, please exit the golf car path at 90 degrees to your ball, drive to your golf ball, then you're riding partner's ball and return straight back to the golf car path.
- Additionally, when possible, please drive your golf car in the rough areas and avoid worn areas as much as possible.
- When checking in with the Starter you will be asked to pair up so your foursome will be using only two golf cars. If there remains a compelling or necessary reason for your group to take three golf cars during your round, one of the three golf cars will be required to remain on the golf car path on each hole.
