

Tee Time Points after 4 pm on Executive Courses

The demand for tee times on our executive courses varies by season; high demand in the fall, winter and spring, and a reduced demand through the summer months (for afternoon tee times). In 2007, in an effort to equitably distribute tee times during the peak season (October – April), a change in the assignment of points was implemented for play after 4:00 p.m.; points are assigned up until 90 minutes before dusk. After much discussion in consideration that the demand for tee times in the summer months are not as high; we will use September as a trial period where no points are applied to golfers after 4:00 p.m. If this trial presents no unanticipated issues, further implementation will be considered next summer (May through September); although points will continue to be assigned for play after 4 p.m. during peak season.
